

# Lowest Barrier to Success

# The Lean Project Manager Advantage

## The Lowest Total Cost

### What We Do

### How We Do It

Lower the cost of analysis and research	Comprehensive website, rapid response sales support, free guided live software demo
Lower the cost of purchase	Affordable software you can be using today. Unlimited users, no license CALs
Lower the cost of Installation	Our simple software products are easy to install. LPM requires one install on one PC or Server resulting in low implementation cost because all users only need a web browser to access the software.
Lower deployment cost	
Cost of software support and maintenance	Our robust software products cost less to maintain.
Lower cost of non-compliance to software and process	Simple to use software leads to high adoption rates. This lowers the management cost of enforcing use of a more complex product
Lower management costs	Easy to use web based software means information can be shared easily without lengthy explanations.
Lower training cost	Easy to use web based software requires very little training. Our familiar web page design will appeal to anybody with experience using the internet

**Confidence:** We encourage our customers to evaluate competitive products and make estimates of how those products stack up against the total cost of our product. We are confident that the above factors combined with our products efficient means of providing the same results give it the largest ROI in the shortest turn around of any competitive product. The time and money saved on traditional software costs, coupled with Lean Project Manager's devotion to honest and beneficial partnering with our clients to achieve goals, allows us to offer maximum value from our products and services.
